	different roles for purchasing commission, trading, and reselling commission
Technologies Responsibilities	Flutter, Dart, Java ● Working in coordination with the design and the testing team to develop better products with fewer bugs ● Worked with the architecture Team to create the design views of Application. ● Implement new technologies to maximize application performance. ● Worked closely with core technology teams and other platform teams to balance cross-platform consistency with Android-optimization.

Big Ideas

Client	News aggregator offering self-improvement and motivational content.
Duration	Jul 2022 – Oct 2023

Project overview	This is unique app for readers and introverts, I meant to introverts because there are certain readers who don't enjoy long and lengthy books on their stack, they prefer stashing and living on deep lines of specific lines of a book from random book or blog which is productive and constructive to specific mindsets.
	The categories are various which are curated and UI is so sweet that you don't skip the short notes, you can simply import your lines from any link that's easy.
Technologies	Next js,Headless CMS, Flutter, Dart, Firebase

App Mitra

Client Duration	Social Networks Site commonly used for fun and activity Apr 2022 – July 2022
Project overview	Project aims to develop a platform where users can share their thoughts and reels.

Technologies Node Js,React Js

Responsibilities	● Working in coordination with the design and the testing team to develop better products with fewer bugs ● Worked with the architecture Team for creating the design views of Application. ● Implement new technologies to maximize application performance. ● Worked closely with core technology teams and other platform teams to balance cross-platform consistency with Android-optimization.
